

RUDRANSH GUJJA

Aspiring Data Scientist | 2nd Year B.Tech Data Science Student

+91-XXXXXXXXXX | rudranshgujja1@gmail.com | linkedin.com/in/rudranshgujja | github.com/rudranshgujja

Hyderabad, Telangana, India

OBJECTIVE

I am a 2nd-year B.Tech Data Science student who is genuinely interested in the field and working hard to build practical skills. I have done a few projects, completed some good certifications, and recently participated in Google's Agentathon 2025. I am now looking for opportunities where I can apply what I have learned and keep growing as a Data Scientist.

EDUCATION

Bachelor of Technology (B.Tech) — Data Science

2023 – 2027 (Expected)

Malla Reddy University, Hyderabad, Telangana

CGPA: 8.49 / 10.0

Relevant Coursework: Statistics & Probability, Python Programming, Machine Learning, Database Management Systems, Data Structures & Algorithms, Linear Algebra, Exploratory Data Analysis

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

ML & Data Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, NLTK

Tools & Platforms: Jupyter Notebook, Google Colab, Kaggle, Git, GitHub, Power BI, Generative AI Studio

Databases: MySQL, SQL Server

Soft Skills: Analytical Thinking, Problem Solving, Teamwork, Communication, Attention to Detail

CERTIFICATIONS

Data Analytics Job Simulation

Deloitte / Forage | Jul 2025

- Did practical data analysis and forensic technology tasks as part of a simulated Deloitte analyst role.

Introduction to Data Analytics

Great Learning | Jul 2025

- Learned the basics of data analytics — how data is collected, cleaned, analysed, and used for decision making.

Introduction to Generative AI Studio

Simplilearn | Jun 2025

- Got familiar with Generative AI concepts, prompt writing, and how to use Google's AI Studio platform.

Alpha — DSA with Java

Apna College | 2025

- Finished Apna College's full DSA course in Java, which covered arrays, trees, graphs, recursion, and dynamic programming.

Free Java Course

GeeksforGeeks | 2025

- Completed a 4-week Java course covering OOP concepts, collections, and core Java programming.

- Completed a 3-week Python course covering the basics of syntax, data structures, and file handling.

HACKATHONS & COMPETITIONS

Google Agentathon 2025 — Agentic AI Hackathon

Dec 20–21, 2025

- Took part in Agentathon 2025, which was organised by GDG Hyderabad at Malla Reddy University and broke the world record for the largest Agentic AI hackathon.
- Worked with Agentic AI tools and Google for Developers technologies over a 2-day competition.
- Teamed up with other participants to build and present an AI agent prototype within the event duration.

ACADEMIC PROJECTS

Movie Recommendation System | Python, Pandas, Cosine Similarity

Jan 2025 – Mar 2025

- Built a content-based recommendation system using TF-IDF and cosine similarity on around 5,000 movie records.
- Deployed it as a Streamlit web app and got good feedback during informal testing.

Customer Churn Prediction | Python, Scikit-learn, XGBoost

Oct 2024 – Dec 2024

- Made a classification model to predict which customers are likely to leave, using a dataset of 10,000+ records.
- Tried multiple models including Logistic Regression, Random Forest, and XGBoost — finally got 87% accuracy and 0.91 AUC-ROC after tuning.
- Made visualisations in Matplotlib and Seaborn to show the results and presented to my faculty.

Exploratory Data Analysis — World Happiness Report | Python, Seaborn

Aug 2024 – Sep 2024

- Did a detailed EDA on the World Happiness Report data covering 150+ countries to find out what factors affect happiness scores.
- Made 15+ plots including heatmaps, pair plots, and maps to present the findings in a clear way.

ACHIEVEMENTS & ACTIVITIES

- Participated in Google Agentathon 2025, the world-record Agentic AI Hackathon by GDG Hyderabad (Dec 2025).
- Completed 6 certifications in Data Analytics, Generative AI, Python, Java, and DSA from recognised platforms.
- Completed the Deloitte Data Analytics Job Simulation on Forage to get some real industry exposure.
- Regularly doing Kaggle notebooks and mini-competitions to practise machine learning on real datasets.
- Active member of the Data Science & AI Club at college — attend weekly sessions on ML topics and data challenges.
